WHY INTEGRAL TACTICAL®

INTEGRAL TACTICAL® was born in the foothills of the Rocky Mountains with our end users in mind. Our products have been tried and tested in the Law Enforcement and Armed Forces, Industrial and Mining, Transportation, Aviation and Aerospace markets. INTEGRAL TACTICAL® promises to provide a finished product that embodies our attention to detail, production quality and design experience using specialized textiles selected by our highly trained manufacturing team and our partnerships with global textile manufacturers. Our operators are trained in industrial sewing, lamination and various styles of welding to offer a high-quality product that will shine in whatever rigorous environment you put them in.

NEW BUSINESS 72

**70+ YEARS OF
MANUFACTURING
EXPERIENCE**

BRAND DIVERSITY

We take pride in offering an expansive selection of products. Our line of products is truly complementary. As a result, INTEGRAL TACTICAL® is proud to serve as your one-stop shop for shelters, sleeping bags, apparel and more.

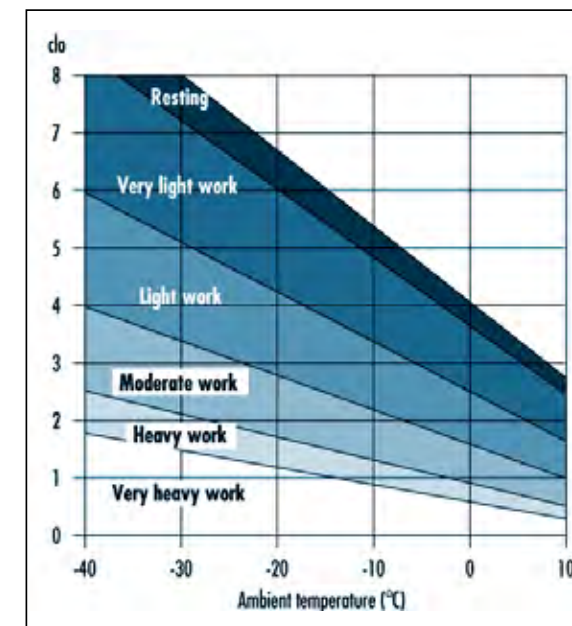

MARKET DIVERSITY

Most of our competitors only participate in a single market, here at INTEGRAL TACTICAL®, we operate in our Military and Law Enforcement legacy markets, the outdoors recreation, snow sport and the hunting markets.

PRODUCT DIVERSITY

INTEGRAL TACTICAL® products are manufactured from materials that offer best in class waterproofing, durability, breathability, temperature protection and weight reduction all while remaining comfortable to wear. Our products are truly tried and tested in inclement weather by Military, Police, Park Rangers and many other customers. We have many years of professional experience when it comes to working with B2B and B2C sales in our various markets. We leverage our solid knowledge as a market leader in the aerospace, defense and industrial textile industries. Furthermore, we leverage our superior engineering and R&D strengths and not only focus on fashion and design. We sell function, not fashion.

WHAT IS A CLO VALUE?

CLO values were developed in 1941 as an attempt to explain the insulation value of clothing. A CLO Value is the amount of insulation that allows a person at rest to maintain thermal comfort in an environment at 21°C or 70°F. These temperature ranges represent “room temperature”.

A 1 CLO value is based on a typical business suit, which includes a shirt, undershirt, trouser and suit jacket. Business suits are less commonly worn today as compared to when CLO values were created, however CLO is still used as a guide to what makes a thermally sufficient outfit, given the local outside temperature.

This chart demonstrates what CLO value is required for the average person during various levels of activity in various temperature ranges. For example, 4 CLO doing very light work, will be comfortable to -10°C, while 7 CLO is almost into the resting activity range at -30°C.

APPAREL

HUNTINGTON VEST

The Huntington Vest was designed to fit closer to the body making it ideal as a lightly insulated mid layer or as a 3-season outerwear item. The Huntington Vest offers some warmth while being very comfortable and light weight. It is a great option for fall camping, where you want to add some extra warmth in the evenings. Made from a durable ripstop outer shell. With the synthetic insulation the Huntington Vest is highly compressible and will dry quickly if it gets wet.

FEATURES

Will be made using 1 layer of 80g PrimaLoft® Gold Insulation with Cross Core™ Technology offering a 2.5 CLO temperature rating. Canadian Average Green, black and MultiCam® versions will be made from ripstop nylon while the Realtree EDGE® version will be made using ripstop polyester. YKK® zipper, protected neck from zipper chain, quilted outer layer, hemmed, arm sleeve and bottom, two zippered waist level front pockets, inside chest tech pocket, dovetail back, tapered fit to be worn as mid layer or outer layer, ripstop polyester / nylon (depending on colour) outer shell that is also water-resistant, water-resistant insulation, taffeta lined, highly compressible. Supplied with Silcoat Stuff Sack. MultiCam® and Realtree EDGE® versions will be made with colour matching taffeta liner and hardware.

Available Sizes: S - XL (custom sizing available)

MCKINLEY VEST

The McKinley Vest is a slight modification of the Huntington Vest, for starters it is quilted all the way through, for body mapped insulation. The McKinley Vest was designed to fit close to the body to make a great 3-season outer layer or a light weight highly compressible midlayer for the winter season. Offers the same warmth as the Huntington Vest. A slightly tighter arm cuff with elastic for a closer fit. The fit is slightly more tapered with an elastic bottom hem to keep the vest closer to the body. Just like the Huntington Vest the McKinley Vest is made from a durable water resistant ripstop (polyester or nylon depending on colour/pattern). It is highly compressible and light weight, the synthetic insulation dries quickly if it does get wet, without losing its insulation properties.

FEATURES

Will be made using 1 layer of 80g PrimaLoft® Gold Insulation with Cross Core™ Technology offering a 2.5 CLO temperature rating. Canadian Average Green, black and MultiCam® versions will be made using ripstop nylon while the Realtree EDGE® version will be made using ripstop polyester. YKK® zipper, protected neck from zipper chain, quilted outer and inner layer, elasticized hem around arm sleeve and bottom, two zippered waist level front pockets, dovetail back, tapered fit to be worn as mid layer or outer layer, ripstop polyester / nylon (depending on colour) outer shell that is also water-resistant, water-resistant insulation, taffeta lined, highly compressible. Supplied with Silcoat Stuff Sack. MultiCam® and Realtree EDGE® versions will be made with colour matching taffeta and hardware.

ANDES JACKET

The Andes Jacket has been shaped to fit closer to the body while still providing room for mid layers if desired. The dove tail design will improve wearability while sitting and assist in preventing drafts up the back of the jacket. The interior of the jacket has been quilted to keep body mapped insulation in place.

FEATURES

Insulated using 1 layer of 200g PrimaLoft® Gold Insulation with Cross Core™ Technology offering a 6 CLO temperature rating. Canadian Average Green, black and MultiCam® versions will be made from ripstop nylon while the Realtree EDGE® version will be made using ripstop polyester. Lightweight YKK® front zipper with inside wind flap, protected top of front zipper to prevent catching, two zippered chest pockets from main zipper to outside of jacket, two fleece lined hand warming chest high pockets with magnet closure, two magnet closure waist level gear pockets, inside left vertical zippered pocket, hidden draft cuffs sized for gloves. Removable hood with fold down zipper chain cover when hood is not attached. Supplied with Silcoat Stuff Sack. MultiCam® and Realtree EDGE® versions will be made with colour matching taffeta and hardware.

RUNDLE JACKET

Best Seller!

This is a close-fitting, lightweight insulating jacket made with proven PrimaLoft® Gold Insulation with Cross Core™ Technology and microfiber fabrics. Very comfortable to wear in a vehicle, around town or in the backcountry. Works well on its own or as part of a layering system. This low loft 3-season jacket is perfect to throw on for added warmth or under one of our Tactical Parkas for a layer of insulation.

FEATURES

The Rundle Jacket is insulated using 80g synthetic PrimaLoft® Gold Insulation with Cross Core™ Technology insulation offering a 2.5 CLO temperature rating. The outer shell will be made using a ripstop nylon for black, green and MultiCam® versions while the Realtree EDGE® version will be made using ripstop polyester. Lightweight front zipper with inside wind flap, two zippered hand pockets, inside left vertical zippered pocket, bound cuffs, thumb loops and bottom hem. No hood. Supplied with Silcoat Stuff Sack. MultiCam® and Realtree EDGE® versions will be made with colour matching taffeta liner and hardware.

DOLOMITI JACKET

Best Seller!

This versatile, all season lightweight jacket is ideal as a layering piece in exceptionally cold conditions. Wear it under your shell jacket, slip it on over your shell if you are stopping for a short break or use it on its own around camp or town. The Dolomiti Jacket can also be used in conjunction with a PrimaLoft® insulated Poncho Liner and Bivy Bag as part of a lightweight sleep system. A Hi-Viz Reflective version is available.

FEATURES

Insulated using 1 layer of 133g PrimaLoft® Gold Insulation with Cross Core™ Technology offering a 4 CLO temperature rating; ripstop nylon shell fabric for Canadian Average Green, black and MultiCam® versions and a ripstop polyester shell for Realtree EDGE® version. 30 denier taffeta inner lining (black); full length YKK® #5 VISLON® separating zipper with inside weather flap; two 8" x 8" outside zippered hand warmer pockets. Inside left zippered pocket; reinforced shoulders, elbows and pocket flaps reinforced with black Taslan nylon; snug fitting Spandura cuffs, inside shock cord and toggle bottom hem adjustment; supplied with Silcoat Stuff Sack, zip on / off hood. Colour matching taffeta and hardware on MultiCam® and Realtree EDGE® versions.

KARAKORAM JACKET

This jacket has been shaped to fit closer to the body while still providing room for thin mid layers. The dove tail design will improve wearability while sitting and assist in preventing drafts up the back of the jacket. The interior of the jacket has been quilted to keep body mapped insulation in place. Based off of the same design as the Andes Jacket, the Karakoram Jacket provides more insulation.

FEATURES

Insulated using 2 layers of 133g PrimaLoft® Gold Insulation with Cross Core™ Technology offering an 8 CLO temperature rating. The outer shell material will be made from ripstop nylon in the Canadian Average Green, black and MultiCam® versions while the Realtree EDGE® version will be made from ripstop polyester. Lightweight YKK® front zipper with inside wind flap, protected top of front zipper to prevent catching, two zippered chest pockets from main zipper to outside of jacket, two fleece lined hand warming chest high pockets with magnet closure, two magnet closure waist level gear pockets, inside left vertical zippered pocket, hidden draft cuffs sized for gloves. Removable hood with fold down zipper chain cover when hood is not attached. Supplied with Silcoat Stuff Sack. HIMALAYAN JACKET

The Himalayan Jacket has been shaped to fit snug to the body while still providing room for thin mid layers. Think of this jacket as a wearable sleeping bag, the loft is designed to compress against the body offering maximum warmth and comfort. In an emergency the Himalayan Jacket can be paired with the Everest Pant and be worn as a sleeping bag. The dove tail design will improve wearability while sitting and assist in preventing drafts up the back. The interior of the jacket has been quilted to keep body mapped insulation in place. Based off of the same external design as the Andes and Karakoram Jacket the Himalayan Jacket provides more insulation.

FEATURES

The Himalayan Jacket will be insulated with 2 layers of 200g PrimaLoft® Gold Insulation with Cross Core™ Technology offering a 12 CLO temperature rating. Canadian Average Green, black and MultiCam® versions will be made from ripstop nylon while the Realtree EDGE® version will be made using ripstop polyester. Lightweight YKK® front zipper with inside wind flap, protected top of front zipper to prevent catching, two zippered chest pockets from main zipper to outside of jacket, two fleece lined hand warming chest high pockets with magnet closure, two magnet closure waist level gear pockets, inside left vertical zippered pocket, hidden draft cuffs sized for gloves. MARMOLADA PANT (PREVIOUSLY DENALI PANT)

The Marmolada Pant was previously known in the INTEGRAL TACTICAL® line as the Denali Pant. If you are familiar with the Denali Pant, these are identical and have simply been renamed. These lightweight insulated pants are the perfect layer to pull on over the top of your active layers when stopping for short break or when setting up camp. The fully separating leg zippers mean that they can be put on without having to take off boots, skis or crampons. The Marmolada Pants are as lofty as 2 layers of fleece at a fraction of the weight. Reinforced with black taslan nylon on the back, knees and instep (no contrasting colors on MultiCam® version). These pants can also be used as part of a sleep system when traveling with a light bag or when conditions get really cold.

FEATURES

Insulated using single layer of 80g PrimaLoft® Gold Insulation with Cross Core™ Technology offering a 2.5 CLO temperature rating; microfiber shell fabric made from a ripstop nylon in the CAG, Black and MultiCam® variants, while the Realtree EDGE® version is made from Ripstop Polyester; 30 denier taffeta inner lining (black); Fully separating YKK® #5 VISLON® leg zippers with inside weather flap and anti-snap webbing; rear right zippered pocket. Elasticized waist with front drawcord and side hook and loop adjustments; Front fly / belay zip, reinforced butt, knees and instep. Supplied with Silcoat Stuff Sack. MultiCam® and Realtree EDGE® versions will be made using colour matching tan interior taffeta and hardware.

COLUMBIA SLEEPING BAG

The Columbia Sleeping Bag boasts 7" of loft and is designed to provide extreme cold weather protection, even in damp conditions, without the use of down fill. It can be used independently or paired with a hygiene liner and overbag for added warmth as necessary. The Columbia offers slightly superior temperature performance compared to our XPD Arctic Down Bag while using less insulation. Named after Mount Columbia, known for its extreme temperatures, often dropping below -30°C with wind chill, making it a fitting inspiration for our most frigid-rated synthetic insulated sleeping bag.

MATERIAL

30D Ripstop nylon shell, DWR treated, 45 G/SM Taffeta liner, 6oz / 200g PrimaLoft Silver I-2001 Polyester Insulation (double layer top and bottom)

FEATURES

- 9.16 CLO (7" loft)
- Mummy Style (left or right zipper)
- Stuff Sack and Compression Sack
- Regular and long fits available

XPD ARCTIC

The XPD Arctic sleeping bag is designed for use in places that get really cold. This is the bag this is most often selected for expeditions to the northern mountains such as Mt. Denali and Mt. Logan and southern mountains such as Mt. Vinson. Even with a substantial differential cut between inner and outer fabrics, this bag will fit snug inside because of the amount of down pushing inwards. The outer shell fabric provides durability through ripstop technology.

MATERIAL

The XPD Arctic comes standard with waterproof-breathable shell fabric. 800FP Grey Goose Down insulation. 45g/sm taffeta liner.

XCSS (EXTREME COLD SLEEP SYSTEM)

The Extreme Cold Sleep System is a one stop sleeping bag solution consisting of 3 components, a Fleece Hygiene Liner, a 850FP down filled Inner Bag and a Synthetic Insulated outer bag. The down and synthetic bags are made using a ripstop nylon shell and taffeta liner. This system was designed to provide the thermal protection required for tropical, subtropical temperate and polar conditions. Each component can be used individually or in any combination of the components. While this system can be used in any combination we suggest using the synthetic bag as your outermost bag to protect from moisture.

CARE INSTRUCTIONS

Wipe with damp cloth and mild soap, hang dry. Do not pack any component while wet. Use a sleeping pad to prevent moisture build up from the ground.

WARNINGS

Inspect entire system before each use for: tears in any component, fraying of cords, damaged or broken cords or cord locks, zipper functions as intended. Do not wear wet clothing inside system components to prevent moisture build up. Always leave face exposed, wear a hat if needed and cinch hood around face if needed. Moisture from breath can build up inside bag and form ice crystals inside the bag.

SIZES

- Small:** Fits 5' 6"
- Medium:** Fits 6'
- Large:** Fits 6' 6"

FEATURES

- Hang Dry Loop
- Cord Management System
- Insulated Draft Tube along zipper
- Quick Egress System that prevents damage to any bag system
- Insulated Draft Collar that tightens around neck to stop the "bellows effect"
- Low shear hook and loop closure on each component
- Anti-snap zipper system with oversized circular zipper pullers

ADDITIONAL SAFETY FEATURE

As mentioned above, the XCSS features a patented system for quick egress in emergency situations, we also added a feature that the zipper ends 2" short of the top of the bag to allow for the bag to open easier. The user is able to "slam" their arms to the side from inside the bag hard enough to cause the hook and loop to shear open and the zipper to pull open enough to assist in exiting the bag (*without damaging the bag*).

GEAR

NIGHT STALKER BIVY (STEALTH BIVY)

A stealth bivy designed for use in all conditions using the a highly waterproof breathable trilaminate fabric. The Night Stalker Bivy has a full hood zipper to facilitate quick entry and exit and a extra interior bug-net panel to increase comfort and venting while in buggy environments.

FEATURES

Made from a highly waterproof breathable trilaminate body fabric and a lightweight 70 denier coated ripstop nylon floor. Access zipper is 65" long, covered with weather flap and runs around top of bivy from left shoulder to right underarm level. Hood can be raised or folded back when using bug net covering over the hood opening, which is on a separate 60" lightweight zipper. The seams have been fully factory seam-taped.

DETAILS

Length: 88" (fits to 6' 6")

Weight: 28 oz (800g)

Girth: Chest 72", Hip 64", Foot 52"

Packed Size: 12" x 4" Black Nylon Stuff Sack

COLOUR VARIANTS

CHRYSALIS BIVY

The Chrysalis bivy has a unique wire-stiffened dome shape over your face which provides for comfortable usage and total protections in foul weather. A rear facing tunnel vent in the hood allows for good air flow and ventilation when the Chrysalis Bivy is fully zipped up. The Chrysalis Bivy has no poles, making set up a breeze.

FEATURES

A continuous zipper with two sliders allows the top fabric to be unzipped and peeled back from the top of the head to waist level on both sides. The top is fully backed by no-see-um netting for a refreshing bug-free sleep on dry evenings. The Chrysalis is ideal for trips where you will be sleeping fully stretched out. There are no skyward facing zippers. In wet weather the rain drains off the dome hood, perfect for drizzly conditions. The upper shell is made from waterproof trilaminate materials, and durable 70D (Polyurethane) PU coated (waterproof) Ripstop (for MultiCam® version) and 200D Black Nylon for other patterns / colours for bottom of the bivy. Seam sealed to block leaks at material joints.

DETAILS

Length: 90" (fits to 6' 7")

Weight: 2 lbs 4 oz (1,055g)

Width: 30" at shoulders tapering to 22" at foot

Girth: 4" at shoulders tapering to 52" at foot

Packed Size: 14" x 5" diameter

COLOUR VARIANTS

■ MultiCam®

UNISHELTER BIVY

The Unishelter Bivy is the easiest shelter to get in and out of. The single hoop pole provides clear space around your head and shoulders allowing you to move and to read a book. On dry evenings roll the top fabric down to waist level and enjoy bug free stargazing. Designed as a light weight alternative for back country camping.

FEATURES

In wet weather keep the top fabric partially unzipped under the protective eyebrow peak for ventilation. The Unishelter Bivy is long enough for a person up to 6' 7" and is wide enough from hip to foot to accommodate a full-length sleeping pad and fully lofted winter sleeping bag. Heavy duty coated nylon floor (coated ripstop nylon MultiCam® floor on MultiCam® model) Made with heavy duty waterproof trilaminate materials for upper shell that has been seam sealed.

DETAILS

Length: 92" fits to 6' 7"
Height: 25" head height

Girth: 4" at shoulders, to 52" at foot
Width: 33" at shoulders, to 22" at foot

OBSERVER SHELTER BIVY

The Observer Shelter Bivy is big enough to hold two people at a squeeze in emergency situations. Plenty of ventilation through the large awning covered mesh foot vent. Easy to get in and out either through the zip back top panel (fully covered by no-see-um netting) or through the front triangular door which also zips down to provide 270 degrees of observation. The Observer Shelter Bivy's wide floor and 30" of maximum headroom provide plenty of space for occupant and gear, for getting dressed, packing gear or spending some down time in during a bad weather day.

FEATURES

The Observer Shelter Bivy is manufactured from heavy duty trilaminate fabric in Woodland (with black 200 D nylon floor) or MultiCam® (with a 70 D MultiCam® coated ripstop nylon floor).

DETAILS

Length: 100" (8' 4")
Weight: 4.75 lbs. (2,160g)

Width: 42" at shoulders tapering to 30" at foot
Height: 30" at shoulders, 25" at thigh, 27" at foot

Packed Size: 20" x 8"

MK1 MOUNTAIN TENT

The original "no frills" tent for moving fast and light in the mountains. Ideal for one person plus gear or two at a squeeze. The MK1 is the perfect parabolic shape and provides the optimum amount of internal space for the minimum amount of material usage. It can be set up in under 2 minutes in just about any spot where you choose to make camp. With 39" of headroom at the apex, this is a comfortable tent to hang out in during bad weather. Options and features are kept to a minimum to eliminate weight and bulk. No fly needed.

FEATURES

Elasticized weather flap over the door. Floor is made from 70 denier, 1.9 oz taffeta nylon and 1/2 oz urethane coating. Two tunnel vents on the side walls. Extra tie points located at the top of the tent and midway up each of the pole seams. Six 8" light weight tubular aluminum stakes. Four 10" lengths of 2.2mm cord. *Due to the angle between floor to apex, the usable floor space is not large enough for people over 6' tall to lay flat on their back.*

DETAILS

Capacity: 1-2
Season: 4
Maximum Height: 39"
Floor Dimension: 82" x 46"
Floor Area: 27 sq/ft
Packed Weight: 5 lbs. 10 oz (including poles, stakes, cords and Silicoat Stuff Sack)
Packed Size: 6" x 18"

MK2 MOUNTAIN TENT

Spending time in the mountains often involves sitting around for days in your tent waiting for the weather to improve. The MK2 Mountain Tent has enough living space for 2 people with high lofted winter sleeping bags. The MK2 Mountain Tent has a parabolic shape similar to the MK1 Mountain Tent but is 25% larger.

FEATURES

There are tunnel vents high up on each side wall for extra ventilation, tie points 1/3 of the way up each pole seam and a full sized 40" high door protected at the top by a wire stiffened eyebrow peak which allows for ventilation. No-See-Um mesh screen is integrated to the outside of the door and vestibule zipper is pre-installed on the tent. There is an elasticized weather flap over the door, the floor is made from 200 Denier Nylon, extra tie points located at the top of the tent. The MK2 Mountain Tent includes six 8" light weight tubular aluminum stakes and four 10" lengths of 2.2mm cord.

DETAILS

Capacity: 2
Season: 4
Maximum Height: 42"
Floor Area: 33 sq/f
Floor Dimensions: 82" x 46"
Packed Weight: 6 lbs. 5 oz (including poles, stakes, cords and Silicoat Stuff Sack)
Packed Size: 7" x 20"

MK2 MOUNTAIN TENT VESTIBULE

Spending time in the mountains often involves sitting around for days in your tent waiting for the weather to improve. The MK2 Mountain Tent Vestibule has enough living space for 2 people with high lofted winter sleeping bags. When adding the optioned vestibule to the exterior door zipper on your tent you free up much more room inside the tent by providing more covered space outside of the tent for your gear. This makes those potentially long hours stuck in your tent due to weather more enjoyable. The vestibules are designed to be colour matching

FEATURES

Top of zipper to ground coverage, pole supported to keep its shape and increase gear storage area. The front flaps also are able to be pulled closed in order to block off wind and weather from all sides.

COLOUR VARIANTS

CAG Black MultiCam® Woodland

HIGH VISIBILITY (HI-VIS) CAMP TENT

The Hi-Vis Camp Tent is built to provide reliable shelter from diverse weather conditions and bugs during backcountry adventures. Its standout feature is a high-visibility roof, ensuring the shelter can be spotted from greater distances—ideal for backcountry environments, summer camps, and settings where a visible base camp enhances safety.

With a spacious 12' x 12' footprint, it offers ample coverage for picnic benches, lawn chairs, or other gear. The tent's treated Ripstop nylon walls and roof panels ensure durability while providing DWR, UV, and FR protection. On windy days, guywires secure the structure, and roll-up wall panels promote airflow.

The roof features downward-angled vents to prevent rain entry, each reinforced with wire stiffeners and equipped with cord lock fasteners for easy closure. One wall includes a zipper closure for convenient entry and exit, while all wall sections can be detached, rolled up, and tied off as needed.

MATERIAL

Alternating orange and white 70D ripstop nylon roof panels (DWR / UV and FR treated / PU coated), No-see-um mesh walls and vent covers, Black Ripstop 70D nylon outer wall panels (DWR / UV and FR treated / PU coated), #5 YKK Zipper with double pull

DIMENSIONS

Base: 12'x12' Octagon

Wall Height: 45" from ground to roof pitch

Center Roof Height: 107" from centre (pole height)

DETAILS

Included: Compression Stuff Sack

Not-Included: Centre Structure Pole

FEATURES

- Hi Visibility roof panels
- No-see-um mesh walls with black vinyl coverings that can be rolled up for air flow
 - Black wall covers hook and loop closure to the panel beside
 - Black wall covers have ties to tie off panels when rolled up
- No floor to prevent wear and tear
- Bottom 4 inches of wall has vinyl splash guard to support structure of tent
- Each wall section has cord for staking to ground
 - Wall splash guard has loops to stake down skirt as per customer feedback
- 5 wire stiffened roof vents with cord lock closures with downward slope to prevent water leaking in
- Zipper door access on one section of tent walls for easy ingress / egress
- Tent stakes provided for skirt
- Fully Seam Sealed
- Cord lock closures for vents

Please Note: the centre structure pole is not provided

TESTIMONIAL / PRODUCT REVIEW:

"We sent our two new bug tents out on our ultimate trips in May. They spent 55 days on the Snare-Coppermine rivers and the Elk-Thelon rivers in northern Canada! Overall, our guides loved them and set them up regularly. They returned in good condition for re-use."

— Cori-Anne H, Camp Wanapitei

TARP 1

The ideal tarp for most camping scenarios whether you are using it as a stand-alone light weight shelter or part of a shelter system. The 5' x 8' tarp's proven design, combines versatility with lightweight functionality. Use it as a kitchen shelter during inclement weather, an a-frame shelter or a gear vestibule for your tent. The 5' x 8' tarp can be set up in numerous different configurations to suit your needs.

FEATURES

Made from coated ripstop nylon or ripstop polyester in the Realtree EDGE® version the 5' x 8' Tarp has 16 tie-out loops and a center loop for a secure set-up. There is no seam, therefore no need for seam sealing.

SIL PONCHO

This ultra-lightweight multi-purpose poncho offers rain protection when being worn or slept under. Edges are fitted with light webbing tie loops and snap closures so it can be used as a tarp or turn it into a makeshift bivy, pack cover or sleeping bag cover. Made with 30 denier parachute ripstop nylon with silicon impregnation which weighs only 1.35 oz per sq. yd. This fabric is incredibly strong and resilient. There are 12 light weight nylon webbing tie loops on the corners and along the edges for versatile tarp set up.

FEATURES

The Sil Poncho hood is located in the center, and has a drawcord adjustment / closure. When worn as a poncho there is 4' (1.2 m) of coverage down the wearer's front and 4' (1.2 m) down the back. The poncho extends 2 1/2' (75 cm) on each side across the shoulders and arms. The back and front of the poncho can be snapped together at waist and thigh level to prevent flapping in the wind. 4 Snaps are installed into the edge of the poncho through the webbing loops. The bottom edge of the poncho has a shock cord installed to enable the poncho to be snugged around the bottom of a backpack and tied off around the wearer's waist for security in windy conditions.

Black Woodland MultiCam® Canadian Average Green

VAPOUR BARRIER SOCKS

These comfortable and simple waterproof socks are designed as a layer to be worn between inner and outer socks to trap the moisture from sweaty feet. This will ensure that the socks and boot liners stay dry, keeping the feet warmer and reduce the possibility of chafing and blisters.

FEATURES

Made from 70 denier taffeta nylon with 1/2 oz polyurethane coating. Fully seam taped to prevent moisture. Elasticized ankle for a snug fit. Above boot top fit. Secured with shock cord and a cord lock. Packed Size 3" x 5". Unisex sizing

SIZES

Small: Size 6-7 (weight 2.5 oz)
Medium: Size 8-9 (weight 2.7 oz)

Large: Size 10-11 (weight 3 oz)
XL: Size 12-13 (weight 3.2 oz)

Based off U.S men's sizing

HOT SOCKS

Designed for those extra cold days and nights when your feet get so cold, they take forever to re-warm in a sleeping bag. These socks are insulated and are designed to replace wet and sweaty socks once you have returned to your campsite or cabin preventing your feet from getting cold in the first place. Hot Socks are designed primarily as a sock to be worn in shoes however they make an ideal camping bootie or slipper.

FEATURES

Made with 133g of PrimaLoft® Gold Insulation with Cross Core™ Technology offering a 4 CLO temperature rating. Made from the same materials as the INTEGRAL TACTICAL® insulated clothing and sleeping bags, a ripstop nylon or polyester depending on colour and pattern. Back panel of socks is made from a 4-way stretch fleece. This product is supplied with a Silcoat Stuff Sack.

SEWTAC

SewTac offers a wide variety of off the roll fabrics, narrow fabrics, hardware, threads, hook and loop. Tailored towards the tactical DIY market with many materials to choose from SewTac is your one stop shop for any material needs.

Acquired by FELLFAB® in 2025 SewTac will continue to expand its offerings.

For a full list of our offerings please visit www.sewtac.com.

WARRIOR GEAR

Warrior Gear was established in 2001 in the Ottawa Valley. Rooted in 30+ years of experience from the Canadian Armed Forces, Warrior Gear was created to provide better kit solutions for armed forces and law enforcement personnel while also providing repair and modification capabilities for existing kits.

The Warrior Gear product line consists of belts, packs, carriers, pouches and accessories as well as Gatorz™ eyewear. Warrior Gear and FELLFAB® offer contract manufacturing, custom embroidery options as well as our brand SewTac. SewTac offers raw materials to the DIY kit makers.

Warrior Gear's name lives on under the umbrella of FELLFAB®, a Family owned and operated business located in Hamilton, Ontario, Canada founded in 1952. As an engineering company that specializes in soft textiles and over 50 years of military and law enforcement product manufacturing; FELLFAB® commits to continuing the legacy of the Warrior Gear Brand.
